DETAILED ACTION

This action is responsive to the application filed on 10/24/2003. Claims 1-26 have been submitted for examination.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: Fig. 4A is missing layout 400, segments 405-420, segment 425, segments 430 and 435 that are mentioned on page 30, third paragraph of specification.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

1. Claims 1-14 are rejected under 35 U.S.C. 101, because the claimed invention lacks patentable utility.

All dependent claims are rejected as having the same deficiencies as the claims they depend from.

Allowable Subject Matter

Claims 15-26 are allowable over the prior art of record.
